

# CybTouch 6 for press brakes

## The Intuitive Programming

CybTouch 6 P is intended specifically for conventional (torsion bar) 2-axis press brakes.

It has an intuitive and vivid color **touch screen**, robust panel design construction and a high integration of functions; all this at a competitive price.

Thanks to its large keys, online help, **simplified software** and many other **automatic functions** that constantly guide the operator, the CybTouch 6 P is as simple as a **positioner control**.

**Easy operating, better bending and powerful features all characterize the CybTouch 6 P.**

### Easy operating

- Large, vivid and high-contrast fully touchscreen.
- Simple pages, clear display, large keys.
- Intuitive user-friendly interface.
- Complete programming for efficient mass-production with multiple bends.
- Easy single bends thanks to the EasyBend page.
- Online help and interactive warning pop-up.
- Comfortable wireless software updating and data backup using PC or Notebook.
- Large variety of languages available.

### Better bending

- Various automatic calculations of bend functions.
- Bending sequences and programs can be memorized.
- Offline PC-based CybTouchSimulator.
- Angle, pressure and crowning management.
- Easy manual movement.

### Powerful

- Bend allowance calculation.
- Pressure – crowning calculation.
- Modulable tools for each part or bend.
- Punch depth calculation.
- Angle and back gauge correction.
